receptive ecumenism asks not what other churches can learn from us but what can we learn

and receive with integrity from our ecclesial others since the publication of receptive ecumenism and the call to catholic learning exploring a way for contemporary ecumenism. In 2008 this fresh ecumenical strategy has been adopted, critiqued and developed in different christian traditions and in local national and international settings including the most recent bilateral dialogue of the anglican roman catholic international commission. This volume consists of thirty eight chapters in this new volume by academics, church leaders and ecumenical practitioners who have adopted and adapted receptive ecumenism in various ecclesial and cultural contexts. It shows how receptive ecumenism has grown and matured. Part one demonstrates how receptive ecumenism itself is capable of being received with integrity into very different ecclesiologies and ecclesial traditions. In part two this approach to transformative ecumenical learning is applied to some recurrent ecclesial problems such as the understanding and practice of ministry, revealing new insights and practical opportunities. Part three examines the potential and challenges for receptive ecumenism in different international settings. Part four draws on scripture hermeneutics and pneumatology to offer critical reflection on how receptive ecumenism itself implements transformative ecclesial learning. Addressing the 70th anniversary of the world council of churches, Archbishop Justin Welby said that one of the most important of recent ecumenical developments has been the concept of receptive ecumenism. This volume provides an indispensable point of reference for understanding and applying that concept in the life of the christian churches today.

This book explores the growing interests of china in the arctic and examines the nature of its interests and motivations in maintaining its involvement and presence in the region. The new geopolitical landscape of the arctic today is a significant departure from the great power politics that existed in the region during the cold war era. Apart from traditional arctic states, more and more international organizations and non arctic states are showing an increased interest in this region. Not least china, many have attempted to interpret china's intention in moving to the high north and this book aims to add to the existing literature from three approaches: china's participation in the international institutions, china's relationships with the arctic stakeholders and china's sectoral engagement in the arctic. In taking a three dimensional approach to the analysis, the author builds a comprehensive picture of china's interests and activities in the arctic, not only from the perspective of china but also from the viewpoint of other arctic states: russia, canada, the u.s., norway, sweden, denmark, finland and iceland. One of the first books in english to cover the subject since the release of china's arctic policy white paper in january 2018, this analysis will be of interest to academics, students of arctic studies, maritime law and international law as well as policy makers in arctic and non arctic states.
